

# Harz<sup>14</sup>

## The ideal resin for your robot!

**Repair of damaged lateral connections**

**Air-free mixing by paste mixing unit**

**DIBt approval for all common robot types**

## Harz14 - making every connection tight again

### The core competences

- Epoxy connection injection resin with DIBt approval
- Can be used with all well-known robot types
- Air-free mixture due to compulsory mixer
- Very good flow behaviour
- Outstanding chemical and mechanical resistance
- Extremely high adhesive strength
- Easy and fast processing

### The fields of application

- Repair of damaged side inlets
- Repair of cracks, faults and joints
- Can be used in sewers made of vitrified clay, concrete, reinforced concrete, fibre cement, clinker as well as in pipes that have been rehabilitated with hose liners.
