

Harz⁸

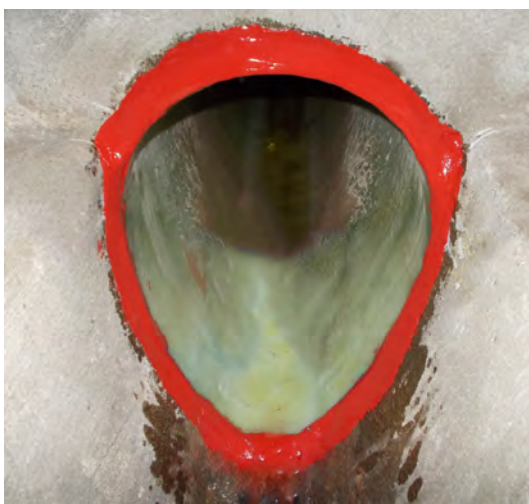

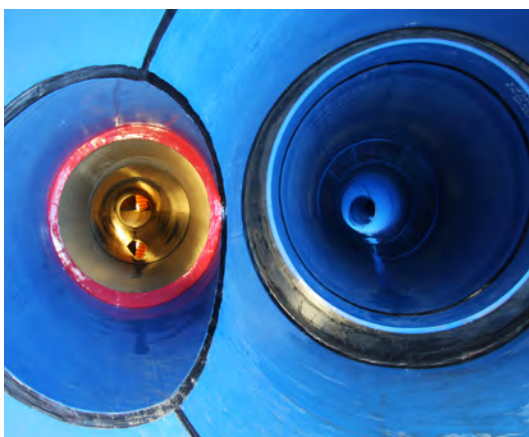

The red-hot solution for the sealing of connections!

Permanently flexible manhole connection

Annular gap sealing for PE and PP

Quality assurance through training

Harz8 - the flexible solution for your connection!

The core competences

- Two-component epoxy resin
- DIBt-Z.42.3-492 for liner connection and annular gap sealing with PE and PP!
- Permanently flexible - even after decades of use
- Excellent mechanical, thermal and chemical resistance
- High adhesive effect - even on damp substrates
- Adaptable to all geometries
- Easy and fast processing
- Fast and crack-free curing
- Quality assurance through user training

The fields of application

- Permanently flexible manhole connection of hose liners
- Annular gap sealing with PE and PP pipes
- Connection of channels
