

PARTLINER™ System

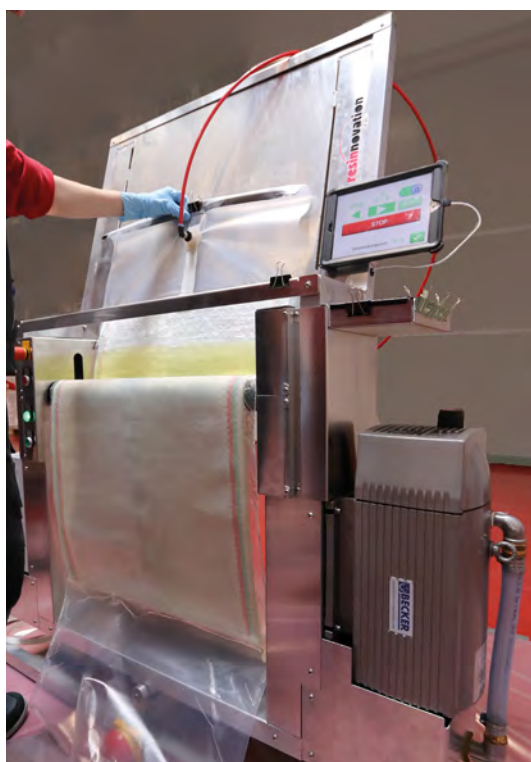

PARTLINER™ sets standards

Exact mixing through dosing technology

Air-free impregnation • Precise calibration

Complete online documentation

Intelligent installation with E-Packer module

Spot repair on a whole new level

The pillars of the system

- ♦ PARTLINER™ Control app
- ♦ PARTLINER™ Dosing Technology
- ♦ PARTLINER™ Vacuum Impregnator
- ♦ PARTLINER™ E-Packer Control

The core competences

- ♦ Precise mixing through Dosing Technology
- ♦ Air-free impregnation through vacuum
- ♦ App-controlled complete online documentation
- ♦ Intelligent installation with Module E- Packer Control

The plus for environment and safety

- ♦ Minimal contact of the user with the material
- ♦ Complete residual emptying of the containers
- ♦ Paperless documentation
- ♦ Powered by solar energy in the rehabilitation trailer

The fields of application

- ♦ Repair of damage in the host pipes and and liners
- ♦ Sealing of pipe connections
- ♦ Removal of flow obstacles such as misalignments
- ♦ DIBT approval also for repair of CIPP, e.g. in the case of faulty bores, stress cracks or flushing damage
