

# **resiShield**

**We have something  
against corrosion!**

**Epoxy-based structural coating**

**High resistance to chemical attack**

**Durable surface protection against abrasion**

## **resiShield** the green protective skin for your structure

### **Three viscosities for all cases**

- resiShield LV: Brushing for thin coating
- resiShield MV: Spraying for large areas
- resiShield HV: Troweling for large coating thicknesses

### **The core competences**

- Permanently chemically resistant e.g. to biodiesel
- High mechanical resistance
- Statically strengthening
- Excellent adhesion even on damp substrates
- Easy and quick application
- Fast, shrinkage- and crack-free curing
- Coating of all geometries

### **The fields of application**

- Corrosion protection for pumping stations and shafts
- Rehabilitation of grease and oil separators
- Abrasion protection for debris pits
